Cubic Block Graphite Heat Exchanger

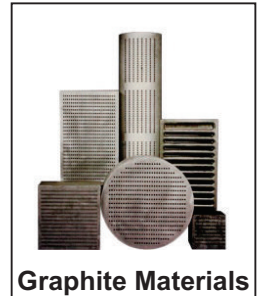

TECHNICAL DATA

Advantages

- Simple structure, easy for maintenance and repair
- Better thermal-shock resistance and Anti - vibration resistance
- Multi-pass design for medium
- Capable for anti-corrosion for both service and process side

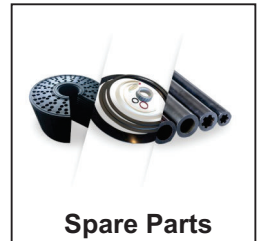

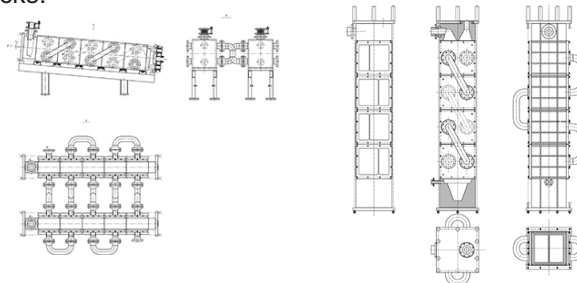

Recommend

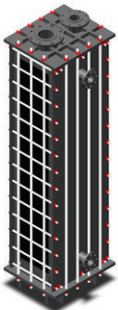

Based the heat transfer areas, we will suggest to use external or internal connect method for the connection between blocks.

Benefit

- Easy for inspection if leakage
- Convenient for chemical and physical cleaning
- Suitable for big heat transfer area

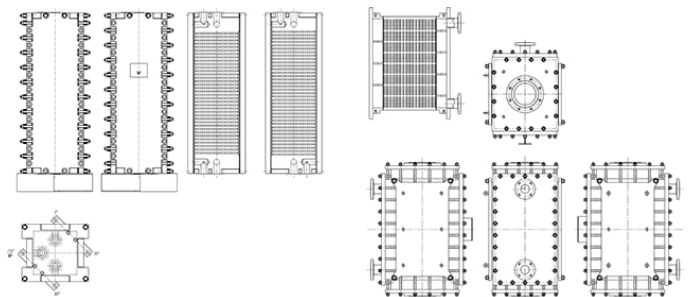

Internal Connection Type Cubic Block Graphite Heat Exchanger

Benefit

- High utilization ratio of graphite material
- Suitable for low flowrate
- Multi-pass and less heat transfer area

Special Application

Graphite Cooler Specialized for Metatitanic Acid
